

# Meet us at Automotive Testing Expo 2009 in Stuttgart

**ExIS offers the greatest selection of equipment and services for particle measurements.**

## ExIS invites you to Automotive Testing Expo in Stuttgart, June 16-18

Together with our partners **Control Sistem** and **MS4** we exhibit particle test equipment at the Automotive Testing Expo. Visit us at booth 1506 (hall 1, right at the entrance) for a "hands-on" demonstration of our test equipment.

### Control Sistem

Control Sistem provide both standard products and customized test solutions for engine, vehicle and component testing.

Particulate sampling systems (micro, mini and full CVS), a driving robot and a motorcycle chassis dynamometer are examples of standard products.

Control Sistem also provides customized versions of standard products. In addition, customer-specific test cells for engine testing, chassis dynamometers, components such as, e.g. brakes, clutches, axles, gearboxes and much more can be provided.

The Micro-PSS for on-board and in-situ measurements

### Examples of applications

- Particulate sampling and measurement in R&D applications (stationary & transient)
- Emission certification
- On-board emission measurements (PEMS)
- Driving robot for a multitude of applications
- Altitude simulation (EACS) in engine testing
- Fully customized test solutions
- Complete test rigs for component testing (i.e. brakes, clutches, gearboxes, axles, etc.)

One of the most interesting products is the unique Micro-PSS dilution tunnel for on-board applications and in-situ measurement applications (see figure to the left).

### Measurements and leasing

Besides sales of instrument ExIS also offers leasing and measurement services as well as consulting in this field.

### Win a 10 Megapixel camera!

Visiting our booth might be worth more than you would imagine. Among those who fill in our enquiry form, we will have lottery draw where the prize will be a 10 Megapixel camera.

*ExIS AB is a distributor of particle instruments in the Scandinavian and Nordic countries. Exis co-operate with suppliers such as Control Sistem (It), Dekati (FIN), Ecomesure (F), Grimm Aerosol (D), Matter Engineering (CH) and Topas (D). The staff of ExIS has comprehensive experience from particle measurements for automotive manufacturers and automotive suppliers.*
